Reliable Tracking. Accurate Measurement.

Extremely Accurate Auto-Tracking

Incorporating the industry's most advanced laser and image processing technologies, the SX offers market leading prism tracking capability and enhanced prediction of prism movement. The SX accurately locks and tracks a moving prism in any jobsite environment.

RED-tech Technology Reflectorless EDM

- Fast distance measurement of 0.9s regardless of object.
- Reflectorless operation from 30cm to 1,000m.*
- Coaxial EDM beam and laser-pointer provide fast and accurate aiming.

*With Kodak Gray Card white side (90% reflective). Brightness level at object surface: ≤ 500 lx.

Advanced Angle Measurement System

SX features Sokkia's original absolute encoders that provide long-term reliability in any job site condition. Dual-axis compensator ensures stable measurements even when setup on uneven terrain.

Long-range Data Communication

- The SX series of total stations features *Bluetooth*® Class1 wireless technology for reliable data communications.
- All SX data is instantly available at the *Bluetooth*-equipped controller.

* Wireless communication range may vary depending on obstruction and other environmental conditions.

RC-PR5 Remote Control System

The RC-PR5 On-Demand Remote allows for rapid prism search. A built-in directional sensor monitors the prism movement so the SX turns left or right whichever direction is closer.

* Red fan beam image is for explanation purposes only.
The actual search beam is an eye-safe Class 1 invisible laser.

Cloud-based Solutions for Precise Positioning*

Advanced six-prism configuration provides unsurpassed measurement precision. ATP1 fits a range pole; ATP1S sliding prism is designed for a pin pole.

ATP1S Sliding Prism

Waterproof, Rugged, and Operator Friendly

- IP65 dustproof / waterproof rating.
- Metal chassis and heavy duty handle.
- Standard usage temperature range -20 to +50°C.

- New star key [★] instantly brings up functions.
- Trigger key lets you take a series of measurements without removing your eye from the telescope.
- Control panel consists of 10-key pad with color LCD touch screen display.
- USB type A / mini B ports as well as serial ports.

- Green / Red telescope guide lights provide efficient guidance in a range up to 150m.

MAGNET™

Cloud-based Solutions for Precise Positioning

MAGNET™ is a software family that uses the “cloud” to seamlessly connect the field and office for data exchange, communications, asset tracking and more.

Real-time connections. When you need it. Where you need it.

MAGNET™ Field

Data collection, stakeout, roads, and coordinate geometry.

TSshield™

Every SX total station is equipped with a telematics-based multifunction communications module providing the ultimate security and maintenance capabilities for your investment.

If an activated instrument is lost or stolen, you can send a coded signal to the instrument and disable it – Your total station is secure anywhere in the world!

And, in the same module, you have daily connectivity to cloud-based Sokkia servers that can inform you of available software updates and firmware enhancements.

*For more detail of TSshield, please refer to the TSshield's leaflet.
